

Home Learning Challenges

These home learning challenges are for you to complete whilst the school moves to home learning for two days over the G7 summit. The challenges are designed to be as 'screen free' as possible. Please bring any home learning completed into school on Monday so it can be shared with teachers and the rest of the class.

| Design, draw and label a cross section of a modern eco house including the eco features that make it environmentally friendly. | Design a flag for an invented new eco friendly organisation. Think about your colour choice and type of symbols you will include. |
| Create a tally chart to show the amount of the four types of recyclable materials in your weekly household recycling. With the tally, draw a bar chart to present the information. | Write a haiku poem about the destruction of the Amazon rainforest and illustrate it with powerful imagery. Remember that a haiku consists of three lines, with the first and last lines having five syllables and the middle line having seven (5-7-5 structure). |
| Make a collage using recycled materials. Create a scene of the beach that is closest to you. | Using recycled materials from your household waste, construct a model of a wind turbine. |
| Create a poster that will encourage people to walk or cycle to school rather than use petrol or diesel powered transport. | Write letter to a member of parliament trying to persuade them to invest in a green issue such as electric powered public transport buses or zero refuse burial. |
