Home Learning Challenges

Choose your home learning challenges from the grid below and upload completed work onto Google Classroom.

Your aim is to achieve a minimum of 20 points each week. You can also choose to complete your 'Chill Challenge' homework challenges.

6 Points	Use scrap cardboard such as empty food boxes to create a scale model of your house and surrounding area. You could paint it to create a more realistic model, even making your own trees and bushes. Look at Google map for accuracy.	Using the bottom of a cardboard box or a wooden frame, create your own miniature garden and take a photo. Find small plants that you can place into a shallow layer of soil. There are lots of plants you can find that many people would consider to be weeds that would work well in your miniature garden.	Create an animated story. This could be an illustrated flip book or stop motion animation using computer software such as moviemaker. Make sure there is a main character that goes on an adventure. Think about your beginning middle and end.	Invent a new board game for two or more players. Think about other board games that you have played and take elements from them to help you but try and make it as original as possible. Think about turn taking, the use of dice and rules that help the game run smoothly.
5 Points	Paint a picture of a sunset or the time that the sun sets from your bedroom window. Think about creating the impression that you are sat in the room looking out of the window.	Cut out small pieces of colour from old magazines and glue them onto a blank sheet of paper to make a self-portrait. Look at yourself carefully in a mirror. You can layer over pieces that you have already glued on to create a blended effect.	Create a reading poster by dividing a sheet of paper into seven boxes. Read your book somewhere different every day for fifteen minutes and then draw yourself in that location. Label each box with your location	Find a recipe and bake a cake for your family. Make sure that you measure out the ingredients carefully, then present the instructions with illustrations as a poster. Make it colourful and eye-catching.
4 Points	Create a ground floor plan of your house, measuring the rooms and furniture with your feet if you do not have a ruler or measuring tape.	Write a letter to a friend telling them about a film or book that you really like and try and convince them how good it is and why they should watch or read it.	Create a fact poster for a person in history that few people have heard of but changed our world in some way. This could be an inventor, someone that introduced something to society or a person that came up with a new theory.	Design your own superhero with their own superhero logo. What will they be called? What will their costume look like? What are their superpowers? What is their weakness? Draw your superhero and write a paragraph explaining their skills and attributes.
3 Points	Construct a robot out of waste boxes, bottles, and cartons. Paint it and photograph it.	Make your own smoothie and design the packaging for an imaginary advertising campaign.	Sculpt small figures out of aluminium foil and create a scene such as a party, sports event, or fight scene.	Make some garden art inspired by the work of the artist Andy Goldsworthy. Make sure to photograph it.
